Xpath
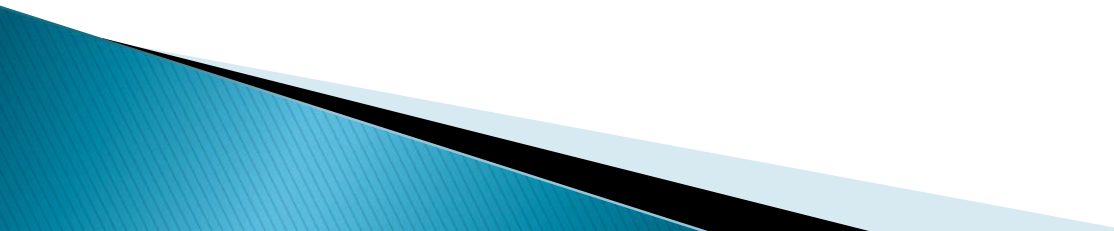

Xpath Terminology

- Tag, Node , Root Node, Parent Node
- Subtag, Subnode, Childnode

Xpath Selecting nodes

- //<node> :- Search and select all the <node> in current page
- /<node> :- Select the immediate child
- //<node>[index] :- Select the node based on index
- //<node>/. : -Select the current node.
- //<node>/.. :- Select the parent node of current node.

Selecting nodes using attribute

- Id
- Name
- Class
- Type
- Use '@' with attribute to use in xpath
- Ex :- //<node>[@<attribute>='<value>']
